Support bandages

Light support bandages, which include the various forms of crepe bandage, are used in the prevention of oedema; they are also used to provide support for mild sprains and joints but their effectiveness has not been proven for this purpose. Since they have limited extensibility, they are able to provide light support without exerting undue pressure. For a warning against injudicious compression see Compression bandages.

CliniLite

Knitted fabric, viscose and elastomer yarn. Type 2 (light support bandage)

CliniLite bandage (CliniSupplies Ltd) 10cm × 4.5m= £0.81, 15cm × 4.5m= £1.18, 5cm × 4.5m= £0.45, 7.5cm × 4.5m= £0.62
