
5 Scale-Up, Technology Transfer, and Process Performance Qualification

*Salah U. Ahmed, Ashok Katdare,
Venkatesh Naini, and Dilip Wadgaonkar*

CONTENTS

Introduction.....	96
Product Development.....	97
Preformulation Studies.....	97
Impact of Excipient Variability on Product Quality.....	99
Particle Shape, Size, and Surface Area.....	100
Solubility in Water and Granulating Fluid.....	100
Crystallinity and Polymorphism.....	100
Moisture Sensitivity and Equilibrium Moisture Content (EMC).....	101
Bulk and Tapped Densities of Major Components.....	101
Flow Parameters.....	101
Granulation Properties.....	102
Drying Properties.....	102
Compaction Behavior.....	102
Potential Changes during Storage.....	102
Formulation Design and Process Development Optimization.....	103
QbD in Generic Product Development.....	103
Design of Experiments (DOEs).....	105
Scale-Up Characterization of Manufacturing Process.....	108
Dry Blending.....	110
Wet Granulation.....	112
Roller Compaction.....	115
Drying.....	116
Milling.....	116
Extrusion/Spheronization.....	117
Compression.....	120
Encapsulation.....	121
Pan Coating.....	121
