

ENDOCRINE AND METABOLIC AGENTS

BRIAN L. FURMAN

*University of Strathclyde, Strathclyde Institute for Biomedical Sciences
Glasgow, Scotland*

- 1 HYPOTHALAMIC HORMONES, THEIR ANALOGS, AND ANTAGONISTS
Thyrotrophin-Releasing Hormone
Corticotrophin-Releasing Hormone
Growth-Hormone-Releasing-Hormone
Gonadotrophin-Releasing Hormone
Somatostatin
- 2 ANTERIOR PITUITARY HORMONES
Growth Hormone (Somatotropin)
Follicle-Stimulating Hormone
Luteinizing Hormone
- 3 NEUROHYPOPHYSEAL HORMONES
Vasopressin
Oxytocin
- 4 THYROID HORMONES AND DRUGS MODULATING THYROID FUNCTION
Iodide
Thionamide Drugs
Potassium Perchlorate
- 5 DRUGS AFFECTING BONE METABOLISM
Parathyroid Hormone
Calcitonin
Bisphosphonates
Mithramycin
Calcimetics
