

# DRUG IMPURITIES AND DEGRADANTS AND THEIR SAFETY QUALIFICATION

ROBIN C. GUY

*Robin Guy Consulting, LLC, Lake Forest, Illinois*

## Contents

- 1 Introduction
- 2 Types and Sources of Impurities
  - 2.1 Manufacturing Impurities
  - 2.2 Degradants
  - 2.3 Leachables and Extractables
- 3 Regulations
  - 3.1 International Conference on Harmonisation (ICH) Guidance
  - 3.2 U.S. FDA (CDER)
- 4 Techniques
  - 4.1 General
  - 4.2 Ultraviolet and Visible (UV/Vis) Spectroscopy
  - 4.3 Atomic Absorption Spectroscopy
  - 4.4 Thin Layer Chromatography (TLC)
  - 4.5 High Pressure Liquid Chromatography (HPLC)
  - 4.6 Mass Spectrometry (MS)
  - 4.7 Gas Chromatography (GC) and Combination of GC and MS
  - 4.8 MS/MS
  - 4.9 HPLC/Mass Spectrometry (LC/MS or LC/MS/MS)
  - 4.10 Common Problems
- 5 Toxicity Assessment
  - 5.1 Literature-Based Approaches
  - 5.2 Common Testing Requirements for New Impurities
  - 5.3 Study Design Based on Exposure, Route, Dosage, and Other Factors
  - 5.4 Documentation Content and Format
