

PHARMACEUTICAL NANOSYSTEMS: MANUFACTURE, CHARACTERIZATION, AND SAFETY

D. F. CHOWDHURY

University of Oxford, Oxford, United Kingdom

Contents

- 1 Definition
 - 1.1 Top-Down and Bottom-Up Approaches to Nanotechnology
 - 2 Taxonomy of Nanomedicine Technologies
 - 3 Nano-Pharmaceutical Systems
 - 4 Description of Nanosystems
 - 4.1 Polymeric Systems
 - 4.2 Quantum Dots and Quantum Confinement
 - 4.3 Metal Nanoparticles and Surface Plasmon Resonance
 - 4.4 Self-Assembled Systems
 - 4.5 Nanostructures Based on Carbon
 - 5 Manufacturing Technologies
 - 5.1 Nanoscale Assembly Methods
 - 5.2 Nano-structuring processes for polymeric materials
 - 6 Characterization Techniques
 - 6.1 Nanoparticle Characterization Methods and Tools
 - 6.2 Scanning Probe Technologies
 - 7 Toxicology Considerations
 - 7.1 Lung Toxicity
 - 7.2 Systemic Uptake
 - 7.3 Skin Permeation of Nanoparticles
