1	INTRODUCTION	354
2	CELLCARD TECHNOLOGY	356
3	GENERAL CONSIDERATIONS FOR MULTIPLEXING CELL-BASED ASSAYS	357
4	GENERAL PROTOCOL FOR USING THE CELLCARD SYSTEM	359
	Experiment Design and Plate Layout	359
	CellCard Preparation	360
	Tissue Culture	360
	CellCard Mixing and Dispensing into 96-Well Format	360
	Compound Addition and Assay Protocol Considerations	360
	CellCard Reading	361
	Image Analysis and Data Visualization	361
5	THEORETICAL EXAMPLE: APPLICATION OF CELLULAR ARRAYS TO THE Identification and Profiling of Cell Type Selective Antimitotic Compounds	362
6	SPECIFIC CASE STUDIES USING THE CELLCARD SYSTEM	363
7	MULTIPLEXED DOSE CURVE ANALYSIS USING THE TUNEL ASSAY	363
8	MULTIPLEXED ANTIPROLIFERATION SCREEN; IDENTIFYING CELL TYPE SELECTIVE Compounds	367
9	SUMMARY OF KEY FEATURES OF CELLCARD SYSTEM	370
	References	371
