Contents

- 1 Introduction
- 2 Flexible Pharmaceutical Manufacturing and Assembly System Design
- 3 Flexible Manufacturing Model Integrated with Design
- 4 Real-Time Operation Control
- 5 Innovative Design
- 6 Open Innovation Architecture
- 7 Generic, Object-Oriented Innovation Process Modeling Method and Sample Model
- 8 Systems Approach to Pharmaceutical Manufacturing Systems Management
- 9 Requirements Analysis for System Product, Process, and Service Design Innovation
- 10 Innovation Risk Analysis and Opportunity Method and Tool with Pharmaceutical Manufacturing System Applications
- 11 Open-Source Computational Statistical and Three-Dimensional Multimedia for Pharmaceutical Manufacturing System Innovation and Project Communication
- 12 RFID Applications
- 13 RFID Examples
