

SAFETY ASSESSMENT STUDIES: IMMUNOTOXICITY

JACQUES DESCOTES

Poison Center and Claude Bernard University, Lyon, France

Contents

- 1 Introduction
- 2 The Immune System: An Overview
 - 2.1 Lymphoid Organs
 - 2.2 Immunocompetent Cells
 - 2.3 Innate Immunity
 - 2.4 Specific Immunity
 - 2.5 External Influences on the Immune System
- 3 Immunotoxic Effects
 - 3.1 Clinical Consequences of Immunosuppression
 - 3.2 Clinical Consequences of Immunostimulation
 - 3.3 Hypersensitivity Reactions
 - 3.4 Autoimmune Reactions
- 4 Preclinical Assessment of Immunosuppression
 - 4.1 Histology
 - 4.2 Hematology and Immunology
- 5 Preclinical Assessment of Immunostimulation
 - 5.1 Histology
 - 5.2 Hematology and Immunology
 - 5.3 Immune Function Assays
 - 5.4 Host Resistance Models
- 6 Preclinical Assessment of Hypersensitivity
 - 6.1 Models of IgE-Mediated Hypersensitivity Reactions
 - 6.2 Models of Contact Sensitization
 - 6.3 Other Animal Models of T Lymphocyte-Mediated Hypersensitivity Reactions
 - 6.4 Models of Pseudoallergic Reactions
