

CASE FOR PROCESS ANALYTICAL TECHNOLOGY: REGULATORY AND INDUSTRIAL PERSPECTIVES

ROBERT P. COGDILL

Duquesne University, Center for Pharmaceutical Technology, Pittsburgh, Pennsylvania

Contents

- 1 Introduction
- 2 Basis for Process Analytical Technology
 - 2.1 Process Analytical Chemistry
 - 2.2 Quality Management
 - 2.3 Lean Manufacturing
- 3 Historical Factors Limiting Implementation of PAT
 - 3.1 Real and Perceived Technological Barriers
 - 3.2 Lack of Economic Incentive
 - 3.3 Regulatory Disincentives
- 4 FDA Twenty-First-Century cGMPs Initiative
 - 4.1 Conception of the Initiative
 - 4.2 Risk-Based Orientation
 - 4.3 Quality Systems Approach
 - 4.4 Science-Based Policies
 - 4.5 International Collaboration
- 5 PAT Evolution in Pharmaceutical Manufacturing
 - 5.1 Process Understanding
 - 5.2 PAT Principles and Tools
 - 5.3 Strategy for Implementation
- 6 PAT Implementation Process
 - 6.1 Preparation
 - 6.2 Assessment
 - 6.3 Analyze
 - 6.4 Control
 - 6.5 Release Philosophy
 - 6.6 Optimization
