

STABILITY: PHYSICAL AND CHEMICAL

ERIC M. GORMAN,¹ BRIAN E. PADDEN,² AND ERIC J. MUNSON¹

¹*The University of Kansas, Lawrence, Kansas*

²*Schering-Plough Research Institute, Summit, New Jersey*

Contents

- 1 Introduction
- 2 Solution Stability
 - 2.1 Chemical Stability
 - 2.2 Physical Stability
- 3 Solid-State Stability
 - 3.1 Physical Stability
 - 3.2 Chemical Stability
 - 3.3 Identifying True Solid-State Chemical Reactions
- 4 Kinetics
 - 4.1 Kinetic Models
 - 4.2 Temperature
 - 4.3 pH
 - 4.4 Buffers
 - 4.5 Relative Humidity
- 5 Accelerated Stability Testing
 - 5.1 Isothermal Kinetics
 - 5.2 Nonisothermal Kinetics
- 6 Improving Stability
- 7 Methods of Analysis
