

# **GABA AND GLUTAMATE RECEPTOR LIGANDS AND THEIR THERAPEUTIC POTENTIAL IN CNS DISORDERS**

ULF MADSEN, HANS BRÄUNER-OSBORNE,  
JEREMY R. GREENWOOD, TOMMY N. JOHANSEN,  
POVL KROGSGAARD-LARSEN, TOMMY LILJEFORS,  
MOGENS NIELSEN, AND BENTE FRØLUND

*Danish University of Pharmaceutical Sciences  
Copenhagen, Denmark*

- 1 THERAPEUTIC PROSPECTS FOR GABA AND GLUTAMATE  
RECEPTOR LIGANDS: GENERAL ASPECTS  
GABA and Glutamate Receptor Ligands as Potential Drugs in  
Neurological Diseases  
Central Nervous System Ischemia  
Alzheimer's Disease  
Other Diseases and Disease Conditions
- 2 GABA: INHIBITORY NEUROTRANSMITTER  
Classification of the GABA System and Therapeutic Targets  
GABA Biosynthesis and Metabolism  
GABA Reuptake  
The GABA<sub>A</sub> Receptor Complex  
GABA<sub>B</sub> Receptor Ligands  
GABA<sub>C</sub> Receptor Agonists and Antagonists
- 3 GLUTAMATE: EXCITATORY NEUROTRANSMITTER  
Classification of Glutamic Acid Receptors  
NMDA Receptor Ligands  
AMPA Receptor Ligands
