

EFFECT OF PACKAGING ON STABILITY OF DRUGS AND DRUG PRODUCTS

EMMANUEL O. AKALA

School of Pharmacy, Howard University, Washington, DC

Contents

- 1 Introduction
 - 1.1 Rationale for Concern with Stability of Drugs and Drug Products
 - 2 Factors Influencing Stability of Drugs and Drug Products
 - 2.1 Moisture, Hydrolysis, and pH
 - 2.2 Oxygen and Oxidation
 - 2.3 Light
 - 2.4 Temperature
 - 2.5 Microbes
 - 2.6 Active Pharmaceutical Ingredients and Excipients
 - 3 Drug Packaging and Packaging Materials
 - 3.1 Introduction
 - 3.2 Materials of Fabrication of Packaging Components
 - 4 Effect of Packaging on Drug Product Stability
 - 4.1 Introduction
 - 4.2 Solid Dosage Forms
 - 4.3 Nonsterile Liquid Dosage Forms
 - 4.4 Sterile Liquid Dosage Forms
 - 4.5 Container Extractables and Leachables and Drug Product Stability
 - 4.6 Biotechnological Products
 - 4.7 A Look into the Future of the Effects of Packaging on Stability of Drug Products
- References
