

# NATURAL PRODUCTS

CHARLES B. SPAINHOUR

- 1 INTRODUCTION
- 2 HISTORY AND BACKGROUND OF THE USE OF NATURAL PRODUCTS AS THERAPEUTIC AGENTS
- 3 NATURAL PRODUCTS RESEARCH AND DEVELOPMENT—AN UPDATE
- 4 DISCOVERY OF NATURAL PRODUCTS
  - Literature Sources
  - Environmental Sources
- 5 ESSENTIAL PHARMACODYNAMICS
  - Protein Targets of Drug Action
  - General Principles of Drug Action
  - Molecular Aspects of Drug Action—Receptors
  - Molecular Aspects of Drug Action—Ion Channels
  - Molecular Aspects of Drug Action—G-Protein-Coupled Systems
  - Molecular Aspects of Drug Action—Receptors as Enzymes
  - Molecular Aspects of Drug Action—Transcription Factors
  - Molecular Aspects of Drug Action—Other Targets
  - Drug Tolerance
- 6 SCREENING FOR NATURAL PRODUCT ACTIVITY
- 7 ISOLATION AND PURIFICATION OF NATURAL PRODUCTS
- 8 STRUCTURE IDENTIFICATION OF NATURAL PRODUCTS
- 9 SYNTHESIS OF NATURAL PRODUCTS
- 10 DEVELOPMENT OF NATURAL PRODUCTS
  - Regulatory Guidelines and Nonclinical Development
  - Learning from the Mistakes of the Past in the Development of Natural Products
- 11 FUTURE OF NATURAL PRODUCTS
  - References
