

MECHANISMS AND CONSEQUENCES OF DRUG–DRUG INTERACTIONS

DORA FARKAS, RICHARD I. SHADER, LISA L. VON MOLTKE, AND
DAVID J. GREENBLATT

Tufts University School of Medicine, Boston, Massachusetts

Contents

- 1 Principles of Drug–Drug Interactions
 - 1.1 Introduction
 - 1.2 Mechanisms of Drug–Drug Interactions
 - 1.3 Methods and Systems for Analyzing Drug–Drug Interactions
 - 1.4 Pharmacokinetic Principles of Drug–Drug Interactions
 - 1.5 Conclusions
 - 2 Case Study A: Drug–Drug Interactions with Triazolam and Other Benzodiazepines
 - 2.1 Introduction
 - 2.2 Metabolic Interactions
 - 2.3 *In Vitro* Studies
 - 2.4 Pharmacokinetic Clinical Studies
 - 2.5 Pharmacokinetic/Pharmacodynamic Integration
 - 2.6 Conclusions
 - 3 Case Study B: Drug Interactions with Herbs and Natural Food Products
 - 3.1 Introduction
 - 3.2 Regulation of Herbal Supplements
 - 3.3 Influence of Herbal Constituents on Drug Metabolism *In Vitro*
 - 3.4 Clinically Significant Drug Interactions
 - 3.5 Conclusions
- References
