

TABLET PRODUCTION SYSTEMS

KATHARINA M. PICKER-FREYER

*Martin-Luther-University Halle-Wittenberg, Institute of Pharmacy, Division of
Pharmaceutics and Biopharmaceutics, Halle/Saale, Germany*

Contents

- 1 Introduction
- 2 Physics of Tablet Formation
 - 2.1 Tableting Process
 - 2.2 Final Formation of Tablet
- 3 Requirements for Tablet Production Systems
- 4 Tablet Manufacturing Process
 - 4.1 Filling
 - 4.2 Compression
 - 4.3 Ejection
- 5 Tableting Machines
 - 5.1 Single-Punch Tableting Machines
 - 5.2 Rotary Tableting Machines
 - 5.3 Application of Tableting Machines
- 6 Tableting Machine Simulators (Compaction Simulators)
 - 6.1 Hydraulic Compaction Simulators
 - 6.2 Mechanic Compaction Simulators
 - 6.3 Application of Tableting Machine Simulators
- 7 Instrumentation of Tableting Machines
 - 7.1 Force Measurement
 - 7.2 Displacement Measurement
 - 7.3 Temperature Measurement
 - 7.4 Measurement of Time
- 8 Analysis of Tableting Process
 - 8.1 Force–Time Analysis
 - 8.2 Displacement–Time Analysis
 - 8.3 Force–Displacement Analysis
 - 8.4 Force–Displacement–Time Analysis
