

# ***IN VITRO* MAMMALIAN CYTOGENETIC TESTS**

**R. JULIAN PRESTON**

*National Health and Environmental Effects Research Laboratory, U.S. Environmental  
Protection Agency, Research Triangle Park, North Carolina*

## **Contents**

- 1 Purpose of Cytogenetic Tests
  - 2 History of Cytogenetic Testing Protocols
  - 3 Description of Endpoints
    - 3.1 Chromosomal Structural Alterations
    - 3.2 Chromosomal Numerical Alterations (Aneuploidy)
    - 3.3 Sister Chromatid Exchanges (SCEs)
    - 3.4 Micronuclei
  - 4 Description of Cell Test Systems
    - 4.1 Established Cell Lines
    - 4.2 Human Lymphocyte Cultures
  - 5 Requirements for Cytogenetic Assays
  - 6 Description of Assays
    - 6.1 Cell Growth and Maintenance
    - 6.2 Metabolic Activation
    - 6.3 Control Groups
    - 6.4 Test Chemicals
    - 6.5 Exposure Concentrations
    - 6.6 Treatment with Test Substances
    - 6.7 Culture Harvest Times
    - 6.8 Chromosome Preparations
    - 6.9 Analysis of Cytogenetic Alterations
    - 6.10 Statistical Analysis and Evaluation of Results
    - 6.11 Test Conclusions
    - 6.12 Test Report
  - 7 Future Directions
- Acknowledgments
- References
