

# IRRITATION AND LOCAL TISSUE TOLERANCE STUDIES IN PHARMACETICAL SAFETY ASSESSMENT

SHAYNE COX GAD

*Gad Consulting Services, Cary, North Carolina*

## Contents

- 1 Introduction
  - 2 Primary Dermal Irritation Test
  - 3 Other Nonparenteral Route Irritation Tests
  - 4 Factors Affecting Irritation Responses and Test Outcome
  - 5 Problems in Testing (and Their Resolutions)
  - 6 Ocular Irritation Testing
  - 7 Vaginal Irritation
    - 7.1 Acute Primary Vaginal Irritation Study in the Female Rabbit
    - 7.2 Repeated Dose Vaginal Irritation Study in the Female Rabbit
    - 7.3 Repeated Dose Vaginal Irritation Study in the Ovariectomized Rat
  - 8 Parenteral Irritation/Tolerance
    - 8.1 Parenteral Routes
    - 8.2 Bolus Versus Infusion
    - 8.3 Test Systems for Parenteral Irritation
    - 8.4 Acute Intramuscular Irritation in the Male Rabbit
    - 8.5 Acute Intravenous Irritation in the Male Rabbit
    - 8.6 Alternatives
  - 9 Phototoxicity
    - 9.1 Theory and Mechanisms
    - 9.2 Factors Influencing Phototoxicity/Photosensitization
    - 9.3 Predictive Tests for Phototoxicity
    - 9.4 Pyrogenicity
    - 9.5 Blood Compatibility
