

# PHARMACEUTICAL PRODUCT STABILITY

ANDREW A. WEBSTER

*McWhorter School of Pharmacy, Birmingham, Alabama*

## Contents

- 1 Introduction
- 2 Kinetic Equations and Half-Life
  - 2.1 Rate Expression
  - 2.2 Order Determination
  - 2.3 Predicting Shelf Life
  - 2.4 Arrhenius Equation and Accelerated Stability Testing
- 3 Degradation Pathways of Pharmaceuticals
- 4 Chemical Degradation
  - 4.1 Solvolysis
  - 4.2 Oxidation
  - 4.3 Photolysis
  - 4.4 Dehydration
  - 4.5 Racemization
- 5 Physical Degradation
  - 5.1 Polymorphism
  - 5.2 Vaporization
- 6 Microbial Degradation
- 7 Stability Guidelines and Regulations
- 8 ICH Quality Guidelines
- References

## 1 INTRODUCTION

Pharmaceutical product stability may be defined as the capability of a particular formulation to remain within its physical, chemical, microbiological, therapeutic,
